

# MICROSCISSORS

Stainless steel precision facial scissors for eyebrows, lashes, and fine hair

## PRODUCT HIGHLIGHTS

- The world's smallest scissors
- Cut as little as one-hair at a time
- Trim facial hair as close as a shave without tweezing a single hair
- Made from quality stainless steel for easy sterilization
- Doesn't need to be sharpened
- Will not cut skin

Beauty doesn't have to mean pain any more! Cinema Secrets innovated the world's smallest grooming scissors to make "plucking" stray hairs on movie sets quick, easy, painless, and sanitary.

These finely tuned, stainless-steel scissors trim hair with precision, almost as close as a razor, but without cutting, pulling, or otherwise irritating the skin. It's the perfect alternative to tweezing, especially in professional settings where sanitation and comfort are priorities. The micro-facial hair scissors feature ergonomic easy-grip handles and never need sharpening.

The Microscissors can also be easily and instantly cleaned by either soaking them in 99% alcohol\* or Cinema Secrets Brush Cleaner for maximum sanitization.

\*If using alcohol, be sure to soak scissors in 99% alcohol and not basic rubbing alcohol, which is only 70%, and will not completely sanitize.
